## Important Information

This report is intended to provide you with an analysis of your financial plan. It is based on the data and assumptions provided by you and your financial professional including but not limited to asset expected returns, volatility, and inflation assumptions. Detailed information regarding assumptions can be found on the disclosure page of this report.

The report shows comparisons of your current plan and a proposed plan. The proposed plan is a recommendation formulated by your financial professional. The report also shows comparisons of your current asset allocation and a proposed asset allocation. The proposed asset allocation is the recommendation formulated by your financial professional.

The report shows the Probability of Success of your plan using a Monte Carlo simulation calculated by running the projection 1,000 separate times. Some sequences of returns used in the Monte Carlo simulation will give you better results, and some will give you worse results. These multiple trials provide a range of possible results. RightCapital considers a trial to be "successful" if, at the end of your planning horizon, your invested assets are greater than zero. The percentage of trials that were successful is the Probability of Success of your plan, with all its underlying assumptions. Detailed disclosure regarding the calculations can be found on the disclosure page of this report.

## Snapshot

## Balance Sheet

Just like any well-run business, your personal balance sheet should always be in check. Your net worth is the difference between your assets and your liabilities. Assets are everything you own such as your home and investments, and liabilities are everything you owe such as the balance on your mortgage and other debt.

## Your net worth is $\mathbf{\$ 3 8 6 , 8 4 4}$ as of $\mathbf{8 / 1 0 / 2 3}$

| Assets |  |
| :--- | ---: |
| Bank | $\$ 15,504$ |
| Invested assets | $\$ 74,670$ |
| Real estate assets | $\$ 823,000$ |
| Life insurance cash value | $\$ 0$ |
| Other assets | $\$ 0$ |
| Total assets | $\mathbf{\$ 9 1 3 , 1 7 4}$ |

| Liabilities |  |
| :--- | ---: |
| Credit cards | $\$ 22,447$ |
| Mortgages | $\$ 454,000$ |
| Home equities | $\$ 0$ |
| Student loans | $\$ 0$ |
| Other debts | $\$ 59,883$ |
| Total liabilities | $\mathbf{\$ 3 8 6 , 8 3 4 0}$ |
| Net Worth |  |

## Liquidity

If a job loss or other financial hardship arises, a liquid emergency fund can help pay bills without dipping into savings or using high interest credit or loans. Your emergency fund should include easily accessible funds like cash and money market funds.

## Liquidity analysis

## Covered expenses

Current monthly expenses ..... \$5,934
Proposed expense buffer ..... \$0
Total covered expenses ..... \$5,934

## Liquidity target

Liquidity target

## Liquidity Details

| Current monthly expenses |  | Current liquidity |  |
| :---: | :---: | :---: | :---: |
| Living expense | \$950 | Andys Account | \$4,929 |
| Housing | \$3,467 | Joint Savings | \$8,200 |
| Debt | \$1,000 | April's Bank Account | \$2,375 |
| Health care | \$0 | Andy Taxable | \$0 |
| Insurance premium | \$517 |  |  |
| Rental and vacation home | \$0 |  |  |
| Other expense | \$0 |  |  |
| Total monthly expenses | \$5,934 | Total current liquidity | \$15,504 |

## Asset Allocation

## Current allocation

All accounts

Annual return: 8.3\%
Standard deviation: 8.4\%

## Target allocation

Growth

Equity / Fixed Income

Annual return: 8.6\%
Standard deviation: 11.7\%

## To balance back to your target portfolio:

| U.S. Equities | Buy | $\mathbf{\$ 1 5 , 8 7 1}$ | U.S. Bonds | Buy | \$13,977 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| International Equities | Buy | $\$ 6,402$ | International Bonds | Buy | $\$ 2,074$ |
| Emerging Markets | Buy | $\$ 1,713$ | Cash | Sell | $\$ 14,157$ |
| Real Estate | Buy | $\$ 812$ | Other | Sell | $\$ 26,692$ |

This page shows a need to increase or decrease the amounts currently represented in these asset classes of the current portfolio.

Returns presented are calculated using historical return data of indices, which serve as proxies for their respective asset classes. They are not returns of actual investments and do not include fees or operating expenses. These indices are unmanaged and the returns are shown for illustrative purposes. Please refer to sections 5 and 8.4 of the disclosure section for more information.

## Asset Allocation Details

|  |  |  |  | -30\% | -20\% | -10\% | 0\% | 10\% |

## Asset Allocation Notes:

Saving mostly through employer plans but Andy also has a Roth and a Taxable account. Great job! Keep it up!

Please refer to sections 5 and 8.4 of the disclosure section for more information.

## Tax Allocation

Tax deferred assets include 401(k)/403(b), IRAs and other tax deferred accounts. Tax free assets include Roth 401(k), Roth IRA, 529, HSA and other tax free accounts. The taxability of the accounts above are based on a variety of factors. Please consult a qualified tax professional to discuss your individual tax situation.

## Tax Allocation Notes:

Lets work towards increasing your tax free money by maxing out your Roth IRA.

## Monte Carlo Analysis

Use of a detailed retirement analysis tool is important to help determine whether you are on track for a successful retirement. Monte Carlo simulations, stress tests, and viewing specific scenarios can help you evaluate your retirement plans and see the impact of potential changes.

This section of the report displays the results of Monte Carlo simulations run on the current and proposed plans. The results are derived from 1000 simulations and the specified retirement cash flows. The chart of probability of success represents the overall likelihood of success in both the current and proposed plan.

IMPORTANT: The projections or other information generated by RightCapital regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Results are based on return and volatility assumptions from a number of market indices shown in disclosure sections 5,6 and 8.4 . Fees and expenses are not included, and thus, are excluded, including, but not limited to, fund fees, account fees, product fees and advisor fees. Inclusion of those fees results in lower returns, which would affect the probability of achieving any particular outcome. Results may vary with each use and over time. The analysis must be reviewed in conjunction with assumptions, limitations and methodologies in the disclosure section. This report is not complete without the accompanying disclosure page.

## Saving Analysis - Proposed plan

IMPORTANT: The projections or other information generated by RightCapital regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Results are based on return and volatility assumptions from a number of market indices shown in disclosure sections 5,6 and 8.4 . Fees and expenses are not included, and thus, are excluded, including, but not limited to, fund fees, account fees, product fees and advisor fees. Inclusion of those fees results in lower returns, which would affect the probability of achieving any particular outcome. Results may vary with each use and over time. The analysis must be reviewed in conjunction with assumptions, limitations and methodologies in the disclosure section. This report is not complete without the accompanying disclosure page.

## Retirement Analysis Notes:

On the right track with current plan, but if we can make some changes to contributions in some of the accounts we can increase our chances of success to $96 \%!!!$

## Stress Test

Even the best retirement plans will be exposed to various risks. These risks can include market volatility, taxation, low Social Security payments, longevity, inflation, and short and long-term health care expenses. It is important to both anticipate and plan for such risks. Doing so can substantially increase your probability of success.

Stress Test results are based on the following assumptions:

| Equity markets drop immediately by | $20 \%$ | Tax expense will be higher by | $20 \%$ |  |
| :--- | :---: | :--- | :--- | :---: |
| Social Security will be reduced by | $20 \%$ | You (and your spouse) will live | 5 yrs. longer |  |
| Inflation will be higher by | $1 \%$ |  | Health care cost will be higher by | $20 \%$ |
| Asset return will be lower by | $1 \%$ |  |  |  |

This section of the report displays the results of Monte Carlo simulations run on various stressed tests. The results are derived from 1000 simulations and the specified retirement cash flows. The probability of success represents the overall likelihood of success in various stress tests.

IMPORTANT: The projections or other information generated by RightCapital regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. Results are based on return and volatility assumptions from a number of market indices shown in disclosure sections 5,6 and 8.4. Fees and expenses are not included, and thus, are excluded, including, but not limited to, fund fees, account fees, product fees and advisor fees. Inclusion of those fees results in lower returns, which would affect the probability of achieving any particular outcome. Results may vary with each use and over time. The analysis must be reviewed in conjunction with assumptions, limitations and methodologies in the disclosure section. This report is not complete without the accompanying disclosure page.

## Optimal Social Security Strategy

There are as many as 700 different Social Security filing strategies that can be tested in order to identify the optimal Social Security benefit for your specific retirement needs. Compare your optimal strategy to others to see the potential benefit of optimization.

## Annual cash flow comparison

## Cumulative cash flow comparison

Age 82 break-even point between the Optimal Social Security filing strategy and Current strategy

## To obtain maximum Social Security benefit

1. Andrew applies own retirement/spousal benefit at age 70 .
2. April applies own retirement/spousal benefit at age 70 .

## Optimal Social Security Strategy

Summary of all strategies

## Life Insurance

The need for life insurance is analyzed by projecting future cash flows for an individual's survivors. This generates a proposed life insurance coverage level that helps ensure the survivors have sufficient assets to reach the end of the planning horizon.

## Andrew’s life insurance analysis

$\$ 4 \mathrm{~mm}$

## April's life insurance analysis

\$750k

If Andrew passes away next
year
\$ 0
$\$ 0$

Current life insurance coverage
\$ 2,890,000
\$ 620,000
$\begin{array}{lll}\text { Proposed additional life insurance } & \text { \$0 \$0 }\end{array}$

## Life Insurance Notes:

You have a substantial amount of life insurance coverage. While it is better to have more than you need rather than not enough. You may consider lowering your coverage and going with a permanent life insurance policy with cash value. You will have adequate coverage while having benefits that a cash value life insurance policy offers! If nothing else you could lower the coverage, keep the term policy, and save some money, which is always nice!!

## Disability Insurance Analysis

According to the Social Security Administration, the chance of becoming disabled before you retire is 1 in 4 - and for most people, disability will result in a lower living standard due to the loss of income.
Having a disability insurance policy can replace lost earnings.

Andrew's income coverage during
disability

- Current income coverage
- Proposed additional coverage
- Uninsured income

April's income coverage during disability

- Current income coverage
- Proposed additional coverage
- Uninsured income

|  | If Andrew becomes disabled <br> tomorrow | If April becomes disabled <br> tomorrow |
| :--- | ---: | ---: |
| Disability lasts | Until retirement | Until retirement |$|$| $\$ 6,200$ | Age 65 |  |
| :--- | ---: | ---: |
| Proposed monthly coverage | Age 65 | 360 days |
| Proposed benefit period | 360 days | $3 \%$ |
| Proposed elimination period | $3 \%$ | Compound |
| Proposed inflation adjustment | Compound | $\$ 1,000$ |

## Disability Notes:

Group Disability is normally not sufficient enough on its own to cover your expenses in the event one of you becomes disabled. This is true in both of your cases. We should look at additional individual coverage to try and fill the gap that is missing with your current disability coverage. A good goal would be to make sure at least 70\% of your income is covered

# Disability Insurance Analysis For Andrew 

If Andrew becomes disabled tomorrow

\$2mm

Proposed plan has
\$0 more
ending assets and lasts 0 years longer than current plan

## Disability Insurance Analysis For April

## If April becomes disabled tomorrow

$\$ 3 \mathrm{~mm} \longrightarrow$

Proposed plan has

## \$481,262 more

 ending assets and lasts 0 years longer than current plan
## Disability Insurance Details

Details if Andrew becomes disabled tomorrow

## Property and Casualty Insurance - Homeowner

Liabilities associated with your home, auto, or other incidents can have a significant negative impact on your finances. Ensure that your insurance coverage is up to date and sufficient.

Proposed homeowner insurance target \%: 80\%

## Property and Casualty Insurance - Auto

## Auto Insurance Coverage

|  | Annual <br> premium | Deductible | Coverage limits | Other coverage |
| :--- | ---: | ---: | ---: | ---: |
| Auto Insurance | $\$ 2,500$ | $\$ 1,000$ | $\$ 100,000 / \$ 300,000 / \$ 0$ | Collision / comprehensive |

Auto insurance plan: Coverage appropriate

## Property and Casualty Insurance - Umbrella

Proposed additional umbrella: \$0

## Profile Notes

## Disclosure

1. No Warranties. RightCapital makes no warranties, expressed or implied, as to accuracy, completeness, or results obtained from any information on www.rightcapital.com (the "Platform"). The Platform uses simplified assumptions derived and/or obtained from historical data that are used to create assumptions about potential investment returns.
2. Advice. RIGHTCAPITAL DOES NOT PROVIDE LEGAL, TAX, ACCOUNTING, INVESTMENT OR FINANCIAL ADVICE. RIGHTCAPITAL DOES NOT PROVIDE RECOMMENDATIONS FOR ANY PRODUCTS OR SECURITIES. Your financial professional may not provide tax or legal advice. The appropriate professionals should be consulted on all legal and accounting matters prior to or in conjunction with implementation of any strategy. Use prospectus for any discussions about securities.
3. Data provided by you or your financial professional for your assets, liabilities, goals, accounts, and other assumptions are key inputs for the calculations at RightCapital. The information should be reviewed periodically and updated whenever there is a change in information or circumstances.
4. Monte Carlo Simulation methodology. RightCapital generated Monte Carlo simulations calculating the results of your plan by running the projection 1000 times. Some sequences of returns will give you better results, and some will give you worse results. These multiple trials provide a range of possible results. RightCapital considers a trial to be "successful" if at the end of the planning horizon your invested assets are greater than zero. The percentage of trials that were successful is the Probability of Success of your plan, with all its underlying assumptions.
5. Asset classes used in Monte Carlo simulation RightCapital uses only a few asset classes. The default return and volatility assumptions of the asset classes are estimated based on the historical return data of indices, which serve as proxies for their respective asset classes. They are not returns of actual investments. The historical return data used to derive returns for all asset classes are:
```
U.S. Large Growth, U.S Large Value and Other: S&P 500 Total Return Index - 12/1971-12/2022
U.S. Mid Cap: Russell Midcap total return index - 12/1995 - 12/2022
Small Cap: Russell 2000 total return index - 12/1980 - 12/2022
International Equities: EAFE Total return (USD return) - 12/1971 - 12/2022
Emerging Markets Equity: MSCI Emerging market index (USD return) - 12/1987 - 12/2022
Real Estate: MSCI US REIT Index - 12/2009-12/2022
U.S. Government:Treasury bonds - 12/1999 - 12/2022
Municipal: Bloomberg Barclays Muni Bond Index - 12/1999 - 12/2022
U.S. Corporate and International Bonds: Bloomberg Barclays US Aggregate Bond Index - 12/1999 -
12/2022
High Yield: ICE BofA US High Yield Index - 12/1999 - 12/2022
Cash: 3 Month Treasury returns-12/1999-12/2022
```

Note: The S\&P500 Total Return Index is made up of both large cap growth and large cap value stocks. This index return and volatility data is used for both large cap growth and large cap value asset classes in the RightCapital system as it is an appropriate benchmark for both. RightCapital uses the S\&P500 total return index as the best proxy for any unclassified assets labeled as 'Other'

This report is not complete without the accompanying disclosure page.
6. Return and volatility assumptions used in Monte Carlo simulations

| Asset Class | Total Return | Volatility |
| :--- | ---: | ---: |
| Large Growth | $10.51 \%$ | $16.1 \%$ |
| Large Value | $10.51 \%$ | $16.1 \%$ |
| Mid Cap | $10.6 \%$ | $16.1 \%$ |
| Small Cap | $10.73 \%$ | $21.9 \%$ |
| International | $8.77 \%$ | $18.5 \%$ |
| Equities | $10.62 \%$ | $27.1 \%$ |
| Emerging Markets |  |  |

| Asset Class | Total Return | Volatility |
| :--- | ---: | ---: |
| Real Estate | $11.93 \%$ | $16.3 \%$ |
| Government | $5.19 \%$ | $5.1 \%$ |
| Municipal | $5.04 \%$ | $3.95 \%$ |
| Corporate | $5.03 \%$ | $5.1 \%$ |
| High Yield | $7.01 \%$ | $5.1 \%$ |
| International Bonds | $5.3 \%$ | $5.1 \%$ |

| Asset Class | Total Return | Volatility |
| :--- | ---: | ---: |
| Cash | $1.59 \%$ | $1.9 \%$ |
| Other | $10.51 \%$ | $16.1 \%$ |

7. Tax and Inflation assumptions used in Monte Carlo simulations Starting federal and state standard deductions, exemptions and the tax brackets used in projections are as of 2023. The following inflation assumptions are used in the projection: General inflation $2.5 \%$; Education inflation $5 \%$; Tax inflation 2.5\%; Social Security inflation 2.5\%; Health inflation: 5\%

## 8. Assumption and calculation limitations of Monte Carlo Simulations

8.1 Your resources and goals may be different from the estimates that you provided: The report is intended to help you in making decisions on your financial future based, in part, on information that you have provided and reviewed including, but not limited to, your age, income, assets, liabilities, anticipated expenses and retirement age. Some of this information may change in unanticipated ways in the future and those changes may make this RightCapital projection less useful.
8.2 Inherent limitations in RightCapital financial model results: Investment outcomes in the real world are the results of a near infinite set of variables, few of which can be accurately anticipated. Any financial model, such as RightCapital, can only consider a small subset of the factors that may affect investment outcomes and the ability to accurately anticipate those few factors is limited. For these reasons, investors should understand that the calculations made in this report are hypothetical, do not reflect actual investment results, and are not guarantees of future results.
8.3 Results may vary with each use and over time: The results presented in this report are not predictions of actual results. Actual results may vary to a material degree due to external factors
beyond the scope and control of this report. As investment returns, inflation, taxes, and other economic conditions vary from the assumptions, your actual results will vary from those presented in RightCapital. Small changes in these inputs and assumptions may have a significant impact on the results.
8.4 RightCapital considers investments in only a few Broad Investment Categories: RightCapital utilizes U.S. Large Growth, U.S. Large Value, U.S. Mid Cap, U.S. Small Cap, Real Estate, International Equities, Emerging Markets Equity, U.S. Government, U.S. Corporate, U.S. High Yield, International Bonds and Cash. These broad investment categories are not specific securities, funds, or investment products. The assumed rates of return of these broad categories are based on the returns of indices. These indices do not include fees or operating expenses and are not available for investment. These indices are unmanaged and the returns are shown for illustrative purpose. It important to note that the broad categories that are used are not comprehensive and other investments that are not considered may have characteristics that are similar or superior to the categories that are used in RightCapital.
8.4.1 Investment Risk: Clients and prospective clients should be prepared to bear investment loss including loss of original principal. Clients should assess their tolerance for risk with their financial professional and update when a change in financial status occurs. Investments are subject to many risks depending on the asset class, including but not limited to: Large Growth, Large Value, Mid Cap, Small Cap, Real Estate: Either the stock market as a whole, or the value of an individual company, may go down resulting in a decrease in the value of client investments. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer. Small cap stocks may be subject to risks such as but not limited to volatility, lack of available information and liquidity due to low trading volume. International Equities, Emerging Markets: Foreign investments may carry risks associated with investing outside the United States, such as currency fluctuation, economic or financial instability, lack of timely or reliable financial information or unfavorable political or legal developments. Those risks are increased for investments in emerging markets. Foreign securities can be more volatile than domestic (U.S.) securities. Government, Municipal, Corporate, High Yield, International Bonds: Investments in fixed income are subject to various risks including changes in interest rates, credit quality, inflation risk, market valuations, prepayments, corporate events, tax ramifications and other factors. Investing in securities involves risk of loss. Further, depending on the different types of investments there may be varying degrees of risk.
8.5 Insurance, Annuities and other related calculations. RightCapital may include Life insurance, annuity or other products in the calculation. The return or returns of any such life insurance product, annuity or other product, as may be included in the calculation, are hypothetical and shall not be used as proxy, replacement for nor construed as actual performance of the product or to predict or project investment results of those products. Product fees, expenses and detailed features may not be completely included and modeled in the calculation. This report should not be construed as an insurance policy application or pre-qualification.
8.6 Fees and expenses: The portfolio returns assume that the portfolio is rebalanced on an annual basis to reflect the target allocation. No portfolio rebalancing costs are deducted from the

This report is not complete without the accompanying disclosure page.
portfolio value. Fees and expenses are not included, and thus, are excluded, including, but not limited to, fund fees, account fees, product fees and advisor fee. Inclusion of those fees results in lower returns, which would affect the probability of achieving any particular outcome.
8.7 Taxes: RightCapital includes limited accounting for taxes. RightCapital calculates taxes based on your input. RightCapital estimates federal, state and local taxes based on current laws with simplified deduction, exemption, and tax bracket parameters of the current year. In the projection, tax parameters are adjusted by an inflation assumption provided by you or your financial professional. Future tax laws may be significantly different than current tax laws and may result in higher or lower taxes due than what are reflected within this report. Roth IRA distribution are tax free if made 5 years after the initial contribution to the plan and you are over 59 1/2. Before investing in a 529 plan, consider whether your state offers a 529 plan that provides residents with favorable state tax benefits. RightCapital includes limited accounting for Federal Estate Tax with simplified deduction, exemption, and tax bracket parameters of the current year. RightCapital does not include any State Estate tax.
8.8 Current Dollars and Future Dollars: The results of RightCapital calculations are in future dollars. To help you compare dollar amounts in different years, results can also be expressed in current dollars by discounting the future dollars by the inflation rate you or your financial professional provides.
8.9 Current allocation and target allocation: Current allocation is the allocation based on the current portfolio holdings entered in the system as well as asset classification data from Morningstar. The target allocation is the allocation recommended by your financial professional.
8.10 Current plan and proposed plan: Current plan is the plan based on the information you and your financial professional input in the profile section. Proposed plan is the plan recommended by your financial professional, with the plan details as shown in the retirement analysis section.
9. Liquidation of holdings: this report may include liquidation of holdings, recommended by your financial professional. The transaction cost of liquidation is not included in the analysis. The liquidation will also result in the loss of future earnings.
